Vacant lots have been cut for the third time and things are starting to look better. I think that you will agree, that the contractor is doing a good job.

Just as a reminder, lot owners are reminded in June that it is their responsibility to keep their lots in accordance with the bylaws. In the event that it is not possible, the HQA will have them cut, once per month during the growing season. The cost to the lot owner is \$75.00 and will be billed by AMCS. The next deadline for lot cutting is October 1. We hope that will be the last cutting for this year.

The appearance of the front entrance has been improved. Some grasses, palms and other plants were planted. The large bed facing Maybank Highway will have additional topsoil added and large snapdragons will be planted this month. They always provide a good show.

Please notice new lighting has been put in place at the front entrance.
